## **Young Storytellers**

In this session, the children and teachers will focus on favorite fairy tales and poetry that compliments the fall season. The children will be guided in author studies, story writing, illustrating, and play acting, focusing on classical children's literature.

## **Math Minds & Scientific Thinkers**

In this session your child will explore math and science concepts such as numbers and operations, patterns, geometry, measurement, counting and comparison, and scientific inquiry through the use of both open ended math manipulatives and science experiments. Through a rich variety of activities children will gain in problem solving, reasoning, communication, representing, the art and fun of board games, and science activities. Each day we will focus on a specific concept. Once the topic is introduced through a story or group activity, we will break into smaller groups for closer investigation.
